

## PRESS RELEASE

### Warning issued on the release of forged MDCAT 2021 results

Pakistan Medical Commission has issued a strict warning against the release of forged MDCAT 2021 results.

These include forged hard copies of MDCAT 2021 results being mailed to students and forged digital results being circulated in various templates online. Pakistan Medical Commission is investigating the matter and any personnel or organization found involved in the dissemination of forged documents will be held accountable by the court of law.

PMC reiterates that the official MDCAT 2021 results are ONLY available on the PMC website. Result tampering in any form is unacceptable and puts a student's application process in jeopardy.
